1 Quiz 5

Solution for q2. I read the problem wrong. What we need to compute is the order of the elemenet we get in the table instead of the real value in this table. Thus I compute the whole problem wrong.

0	1	2	3
1	3	2	1
2	6	5	4
3	9	8	7
4	12	11	10
5	15	14	13

The value we needed is the right bottom cell 13.
To get 10 we need the cell 7&8. It's just top and top left cell in each iteration. □
